

Installation Qualification for rpact

RPACT

September 14, 2026

Introduction

This report presents the results of the Installation Qualification (IQ) testing for the rpact package, conducted using the `testPackage()` function. The IQ process is essential for verifying that rpact is installed correctly and operates as intended in your target environment, ensuring compliance with GxP regulatory requirements. The tests performed are designed to validate the functionality and reliability of the package, providing confidence for its use in regulated settings.

System Information and Environment Details for Qualification

- **Date of creation:** September 14, 2026, 15:54:01
- **Creator:** rpact function *testPackage()*
- **rpact package version:** 4.3.0
- **rpact package release date:** Dezember 16, 2025
- **System user:** *charlottemi*
- **System ID:** c3e6a71543e928b9b70f840341668c4b

R Version

- **Version:** R version 4.5.3 (2026-03-11 ucrt)
- **Platform:** x86_64-w64-mingw32
- **Running under:** Windows 11 x64 (build 26100)

Summary

The test ended at 15:54:04 on September 14, 2026.

A total of 110 tests were executed during the Installation Qualification:

- 110 tests passed successfully.
- 0 tests failed.
- 0 tests passed with warnings.
- 0 tests were skipped.

Only a subset of the 38063 available rpact unit tests were executed. You need to successfully complete all tests to confirm that rpact is correctly installed and functioning properly in your environment. This means the package is not yet validated for use in GxP-compliant settings. Please read the vignette Installation Qualification of rpact to learn how to qualify rpact for reliable statistical planning, simulation, and analyses in regulated areas.
